

COPENHAGEN, DENMARK - October 25, 2012 - **Novozymes**, the world leader in **bioinnovati**
on and **ind**

ustrial

enzymes

, today reported

sales

growth

of

6%

in

DKK

for the first 9 months of

2012

. EBIT grew by 12% compared with the first 9 months of 2011, increasing the EBIT margin to 24.6%. The expectations for full-year 2012 EBIT growth, EBIT margin and net profit growth are maintained, as is the expectation for free cash flow. The expectation for organic sales growth is adjusted within the previously announced range to 4%. Sales growth is now expected at 3% in local currencies and 7% in DKK.

“While sales performed below our full-year expectations, it's good to see the strong earnings development in the first 9 months of 2012,” says Novozymes CEO Steen Riisgaard. “Enzyme sales to the Household Care and animal feed industries performed well as anticipated, but sales growth in the bioenergy area remains challenged. As a consequence, expectations for full-year sales growth have been adjusted, whereas the outlook for earnings and cash flow is unchanged.”

Other highlights:

Gross margin was 57.2%, an increase of 0.8 percentage point compared with 9M 2011

EBIT was DKK 2,074 million, up 12% on 9M 2011

EBIT margin was 24.6%, an improvement of 1.3 percentage points on 9M 2011

Net profit was DKK 1,523 million, an increase of 4% compared with 9M 2011

Free cash flow before acquisitions totaled DKK 1,188 million, against DKK 1,527 million in 9M 2011

The full stock exchange announcement is attached.
