

DEERFIELD, IL, May 10, 2016 – Sterigenics International LLC, the leading global provider of contract sterilization, gamma technologies and medical isotopes, and a portfolio company of Warburg Pincus and GTCR, today announced expansion at their Wiesbaden, Germany location. The expansion will increase ethylene oxide processing capacity by 20 percent and allow for additional future capacity expansion of an additional 20 percent. Construction will be completed by Q1 2017.

“This expansion represents the continued execution of our growth strategy,” said Michael Mulhern, CEO of Sterigenics International. “We will continue to pursue high impact acquisitions such as the recent addition of Nelson Laboratories, while at the same time, expanding our existing capabilities.”

“The Wiesbaden expansion is in response to growing demand for ethylene oxide processing in Western Europe,” said Philip Macnabb, President of Sterigenics International. “Wiesbaden has always been a premier facility and this expansion will not only address our short term need, but allow for growth for the future as well. This first part of this expansion will increase capabilities across all phases of the ethylene oxide processing from pre-conditioning, to chamber space and aeration.”

Opened in 2006, Sterigenics Wiesbaden provides routine ethylene oxide processing, rapid turnaround STAT service, process validation and laboratory testing.

## About Sterigenics International LLC

Sterigenics International LLC, along with its affiliates, is a global leader in outsourced contract sterilization services, gamma technologies and medical isotopes, and the only vertically integrated sterilization company in the world. Operating out of 48 facilities in 13 countries across the Americas, Europe and Asia, Sterigenics provides contract sterilization and ionization services for the medical device, pharmaceutical, food safety, and high-performance materials industries. Through Nelson Labs, Sterigenics offers microbiological and analytical testing and consultancy to assist customers in developing and maintaining sterilization solutions in medical devices, tissue/implantable products, and pharmaceuticals and biologics fields. Affiliate Nordion positions Sterigenics as the world's largest provider of Cobalt-60 used in the gamma sterilization process as well as medical isotopes used in the diagnosis and treatment of various diseases and cancers. Sterigenics International LLC and its affiliates serve more than 2,500 customers around the world and is owned by private equity firms Warburg Pincus and GTCR.
