

Health coach will help empower patients to make healthy lifestyle changes. The **Malta House of Care Health**

Coach Program is the second funded by
Boehringer Ingelheim Cares Foundation

RIDGEFIELD, Conn., Apr. 18 /CSRwire/ - The Boehringer Ingelheim Cares Foundation and Malta House of Care today announced the launch of a new Health Coach Program at the Malta House of Care mobile medical clinic in Hartford, CT, for uninsured patients with chronic disease. The bilingual health coach will work one-on-one with motivated patients to equip them with the knowledge, skills and confidence to better manage their chronic health conditions including high blood pressure, high cholesterol and diabetes.

“Managing chronic disease isn’t easy for anyone, but it’s especially hard for those without insurance,” said Michelle Murphy, executive director, Malta House of Care Foundation. “That’s why we are so excited to be partnering with Boehringer Ingelheim Cares Foundation to bring this wonderful new resource to patients who rely on Malta House of Care as their medical home.”

The health coach will partner with patients who have struggled to manage their health in the past, working at the mobile medical clinic’s sites in the Asylum Hill, Barry Square and Downtown neighborhoods in Hartford, and at the Burnside Avenue location in East Hartford. Success will be determined by measuring changes in clinical outcomes such as blood pressure, blood sugar and cholesterol; overall clinic productivity; and patient and staff satisfaction.

The Malta House of Care Health Coach Program is an expansion of Boehringer Ingelheim Cares Foundation-funded health coach programming with AmeriCares Free Clinics, which currently serves uninsured patients at the Boehringer Ingelheim AmeriCares Free Clinic in Danbury, CT. The Health Coach Program model was born out of a cross-sector assessment of community needs, existing programming and best practices in improving patient outcomes nationwide. The field of health coaching emerged to fill an information gap, based on research that shows half of patients—with and without insurance—leave medical visits without understanding their provider’s advice. [\[1\]](#)

“The mission of the [Boehringer Ingelheim Cares Foundation](#) is to improve the lives of patients in need in our local communities and around the globe,” said Paul Fonteyne, president and CEO, [Boehringer Ingelheim USA](#) and chairman, [Boehringer Ingelheim Cares Foundation Board of Directors](#). “We’re pleased to support the [Health Coach Program](#) expansion to [Malta House of Care](#) to provide more uninsured patients with the skills and confidence to take charge of their health and achieve their health goals.”

Health coaching involves one-on-one interactions with patients to ensure they have the information they need, and understand what they need to do achieve their health goals. The approach can also help offset the heavy workload placed on primary care providers for chronic disease management. [\[2\]](#) Lack of health adherence is a widely-recognized threat to public health and results in poor patient health outcomes. Non-adherence is also a significant financial burden on the healthcare system—not taking medication as prescribed is estimated to cost the U.S. healthcare system \$300 billion annually. [\[3\]](#)

“In the first year of the [Health Coach Program](#) in Danbury we’ve seen even small changes in diet and exercise can make a difference in a patient’s health and the health of their families,” said Karen Gottlieb, executive director, [Americares Free Clinics](#). “We know it’s not about telling patients what to do, but rather empowering them to take control of their own health. This is an exciting opportunity to bring that support to the community served by [Malta House of Care](#).”

About [Boehringer Ingelheim Cares Foundation](#)

[Boehringer Ingelheim Cares Foundation](#) is a non-profit foundation with a mission to provide “more health” to patients, families and communities through its major programs:

1. A Patient Assistance Program that makes our branded medicines available free of charge to patients without prescription insurance coverage who meet certain eligibility criteria
2. A Product Donation Program that donates [Boehringer Ingelheim](#) medicines to approved nonprofit partners who meet certain standards, and who distribute the medicines around the world where there is tremendous unmet need
3. A Strategic Community Investment Program that provides financial support to Connecticut community-driven programs that improve access to healthcare and enhance

primary and preventive health care and health coaching to uninsured adults in Greater Hartford, Connecticut. With a small paid staff and generosity of about 40 volunteer doctors, nurses and other medical providers, Malta drives into four economically challenged neighborhoods every week, bringing hope and healing on its big, white, iconic van. Since its founding in 2006, Malta has provided 41,314 free patient visits to about 7,500 people who otherwise would have had nowhere to turn for primary care, testing, diagnosis, treatment, medication and health education.
